

## Casting Knife Film Applicator

Micrometric Manual Film Applicators

### Catalog Info:

CKFA-MANUAL

### Description:

Micrometric Film Applicator made in anodized aluminum with a reservoir and a beveled blade applicator body, and is suitable for high-precision manual application of high viscosity fluids on to relatively firm substrates.

The gap can be adjusted, in 1 micron intervals, from 0 to 1mm by the inclination of the device, using a micrometric screw.

### Technical Specification:

**Film Thickness** Adjustable with two Micrometric Screws  
(from 0 $\mu$ m up to 1000 $\mu$ m)

**Film Width** 200mm  
8inches
